Web Developer & Designer

Profile

Passionate and self-motivated web developer with experience in creating user-friendly and modern websites. Skilled in web design with WordPress and building dynamic applications. Focused on delivering efficient, functional, and visually appealing solutions to clients' digital needs.

Work Experience

Web Developer Trainee | Webbiit Technologies

FULL STACK WEB PROGRAMMER

- Collaborated with a supervisor to learn and implement web programming solutions.
- Gained practical experience in HTML, CSS, PHP, and JavaScript.
- Built and improved websites, enhancing client satisfaction.

Key Projects

- **Logistics Website:** Designed and developed a functional logistics website to manage transport requests and streamline operations.
- **Church Website (WordPress):** Created a church website using WordPress, integrating live streaming and a sign-up system for user engagement.
- **Event Management Website:** Built a dynamic event management system where users can create events, RSVP, and leave comments.
- **Blog Website:** Developed a blog platform with a focus on mobile responsiveness and error-free deployment on cPanel.
- **Music Website:** Designed an interactive music website to showcase tracks and engage users with a clean interface.
